

Panel Track Brackets

(A)

Inside / Ceiling Mount
Used on 2 and 3
channel track
Bracket Clip
(Part #181-CA-00700)

(B)

Inside / Ceiling Mount
Used on 4 and 5
channel track
Bracket Clip
(Part #181-CA-00600)

(C)

Outside / Wall Mount
Used on all tracks
Installation Bracket
(Part #30-CA-06600)

Valance Brackets

Outside Mount
4" x 4" L-bracket
for 3-1/4" dust cap
(Part #BRKT-L4)

Inside Mount
Hex Head Screw
1-1/2" #8
(Part #02-70-9021)

How To Measure

Note: Projection of window handles / cranks could interfere with panel track panels . . . refer to "mounting depth requirements" on page PT-5.

Inside Mount (IB) Installation – Window

To find width: Measure the opening across the top where the headrail is to be installed from inside of jamb on left to inside of jamb on right. **Round the measurement down to the nearest 1/8". Refer to mounting depth requirements.**

To find height: Measure from the inside top of the opening on the left, at the centre, and on the right to the sill; **round the measurement down to the nearest 1/8" and note the smallest dimension. Do not make any allowances: the factory will make all adjustments so the headrail will fit the opening properly and the panels will clear the sill by 1/2".**

Inside Mount

Outside Mount (OB) Installation – Window

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest 1/8". Blind should overlap **opening at least 4"** on each side to ensure privacy.

To calculate stack dimensions, refer to page 5. To find height: Measure the height of the area to be covered and **round down to the nearest 1/8"**. Blind should extend **at least 3"** above and **3"** below opening or window moulding.

Outside Mount

Outside Mount (OB) Installation – Patio Door / Room Divider

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest 1/8". Blind should overlap opening at least 4" on each side.

To find height: Measure the height of the area to be covered and round down to the nearest 1/8". Blind should extend at least 3" above opening or window moulding. For ceiling-to-floor installations, deduct 1/2" for proper clearance. Specifying OM measurement means the factory makes no allowances.

Caution: Panel Tracks installed on windows near wall or baseboard heaters must clear the heaters by 12" above.
